Summary

A passionate developer with a focus on Full-Stack Web Development.

Studying System Development and Analysis at Unicessumar.

I always thought that my biggest dream was to become a commercial pilot, but since my first contact with programming, a greater desire grew within me: the desire to develop whatever my imagination allows. Since then, I have been learning to make this dream a reality.

My current main skills include: JavaScript, TypeScript, Python, CSS, HTML, Node.js, React, Express, SQL, Oracle Cloud, and Git/GitHub. I am also enthusiastic about learning other languages, frameworks, and features.

My specialties include: fast learning of new languages, problem-solving, algorithms, data structures, optimization, API integration, and Software Development.

Experience

Translator
Appen
Feb 2021 - Jul 2021 (6 months)
Engaged in various tasks, including translation work between English and Portuguese, database enrichment and data collection.

Software Engineer
FutureMe
Jan 2022 - Present (2 years)
